## ECOLOGO®

[www.ul.com/el](http://www.ul.com/el)

UL Environment's ECOLOGO® Program helps build and strengthen trust in sustainable products. Certification to one of UL's rigorous, multi-attribute, lifecycle-based standards indicates that a product has undergone third-party auditing and verification to stringent, science-based performance criteria, making it a more sustainable choice.

Shown as: in product charts

- UL certifies commercial and household toilet and facial tissue, napkins, and hand and kitchen towel products under its UL 175 Sanitary Paper Standards for an overall reduced environmental impact.
- These standards address recycled content and chlorine-free bleaching processes.
- Standard criteria also includes "downstream" effects such as effluent content, air emissions, solid waste reduction, and energy consumption.
- The holistic approach incorporated in this certification matches our philosophy of environmental stewardship.

## Forest Stewardship Council® (FSC®)

<https://us.fsc.org/en-us/certification>

FSC ([www.fsc.org](http://www.fsc.org)) certification ensures that products come from responsibly managed forests and other controlled sources that provide environmental, social and economic benefits. FSC Chain-of-Custody certification traces the path of products from forests through the supply chain.

Over the past 20 years, FSC® has earned a reputation as the most rigorous, credible forest certification system. FSC is the only forest certification system governed by an open membership (General Assembly) where interests are equally balanced by economic, social and environmental chambers.

- Certifiers assess forest management using the FSC standards. Certifiers are independent of FSC and the companies they are auditing. This third-party verification is crucial to the integrity of the FSC system.
- Forest Management certification provides assurance that forests are being managed to the highest environmental and social standards.
- Chain-of-Custody certification provides assurance that products bearing the FSC label directly support responsible forest management.
- **FSC Mix (FSC M) and FSC Recycled (FSC R)** certifications are available for all Essity mills in North America.

- The Green Seal Standard for Sanitary Paper Products, GS-1, establishes environmental, health, and social requirements for products such as bathroom tissue, facial tissue, paper towels, napkins, and placemats for both institutional and retail markets.

### Green Seal-Certified Paper Products:

These products meet Green Seal™ Standard GS-1 based on chlorine-free processing, energy and water efficiency, and content of 100% recovered material with a minimum of 25% post-consumer material for bath tissue and 50% post-consumer material for napkins and towel.

Shown as: in product charts

## USDA Certified Biobased Product

[www.biopreferred.gov](http://www.biopreferred.gov)

The BioPreferred Program is a USDA-led initiative that aims to facilitate the development and expansion of markets for biobased products. The increased development, purchase, and use of biobased products will reduce our Nation's reliance on petroleum, and increase the use of renewable agricultural materials.

- The BioPreferred Program is transforming the marketplace for biobased products through two initiatives: mandatory purchasing requirements for Federal Agencies and Federal contractors and voluntary product certification and labeling.

## Tork Microfibers

Microfibers are very fine so that they have a lot of surface area, which increases the absorbency. Microfiber cloths have pockets, which easily pick up dirt and dust and are also fine enough to pick up microbes. When woven together into a textile cloth, microfibers create a cloth with excellent and efficient cleaning properties.
